MISSION STATEMENT

Trinity University of Asia is a private, non-stock and non-profit institution of learning. She upholds quality Christian education and the ideals of Love, Freedom and Service. She develops and nurtures its community members to become responsible, competent, and productive citizens who could contribute to the achievement of a more humane society.

“Preparing for Life through God-Centered Service and Education”

We instill relevance and Christian values in all our academic programs and a development-orientation in our co-and extra curricular activities.

We provide effective and efficient services for a quality learning environment.

We encourage self-improvement among employees to gain higher competence and better skills towards service excellence.

We extend our ideals of service excellence to our partners:

by providing opportunities and necessary tools for the empowerment and self-reliance of the communities we serve; and

by collaborating and sharing resources with other institutions through service learning.

We exercise situational and servant leadership in the sound management of our human and material resources.

ELEMENTARY OBJECTIVES

The Elementary School aims generally to develop children into well-adjusted adolescents and prepare them to tackle the requirements of secondary education.

Specifically:

1. To develop children’s innate potentials by providing them with opportunities to participate in the academic, social, cultural and artistic pursuits of the school.

2. To help children understand and have the correct concept of themselves and their environment, and;

3. To teach children love and service for God, country and people through character building and strengthening of spiritual and moral values.
